New Product Announcement Bulletin

SMART-STEER™ 2.0

INGERSOLL AXLE

Ingersoll Axle by Dexter is proud to announce the all new **SMART-STEER 2.0**, the next generation of self-steer axles.

Key benefits of SMART-STEER 2.0

1. An engineered, weight reduced torpress that is easy to install with the same center-steer stability. This design feature eliminates the need for the proportioning valve (pressure regulator) which gives better performance, increased life and reliability, and reduced need for service.
2. Engineered bolt-on steer arms that are service replaceable.
3. Engineered bolt-on steer stops that make it easier to change the steer angle in just a few minutes (- 12 °, 20 °, 25 °, 28 °, and 30 °).

All applicable orders received on or after Monday April 3, 2017 will be entered and built to this new specification. Please note that service and warranty support for existing products will continue. A cross reference table is attached showing the old and new SSA part numbers for the key SSA parts.

Cross reference table:

SSA 2.0 MODEL	WELD-ON MODEL	BRAKES	SPINDLE	TRACK	TIE-ROD
750214-1	700214-1	16.5 DRUM	F22	77.5	-5"
750923	700923				-8 7/8"
