Ingersoll Axles/Standens Axle Policy

Due to safety and liability reasons, it is the policy of IMT Corporation and its divisions not to sell any axle weld-on components that involves any welding of such components to or on the axle beam or spindle.

This includes but is not limited to spindles, weld on spiders, brake flanges, brackets, tubing and suspension parts.

Under this policy any axle that is in need of repair must be replaced with a new axle with components welded by IMT/Standens personnel.
